

Choosing the Right Cabinet:

Flammable Liquid • Acids and Corrosives • Paints and Inks • Pesticides

Step 1

Identify the type of chemicals to be stored and choose from the cabinets listed above.

Step 2

Identify the size of containers being stored and your capacity requirements.

Step 3

Choose the Door Style that best fits your needs. (Some states or locales follow either the *International Fire Code* or *NFPA 1 Uniform Fire Code™* which mandates the use of self-closing cabinets.)

(Some states or locales follow either the *International Fire Code* or *NFPA 1 Uniform Fire Code™* which mandates the use of self-closing cabinets.)

Manual and Self-Closing Doors

Manual-closing door

Self-closing doors feature manual latch with fusible link.

Latch holds door open when in use and will release to close door automatically when temperatures reach 165°F.

Full length continuous door hinges

Powder coat finish

Heavy-duty ribbed, galvanized steel shelves deliver load capacity of 350 lbs. per shelf and are adjustable on 3" vertical centers

Screened flame arrester vents on both sides of cabinet (one high and one low) are threaded to accept standard 2" pipe for external exhaust

Four, Zinc-plated leveling legs included

All-welded 18-gauge, double wall construction with 1½" of insulating air space offers fire resistant protection

Black, flush-mounted paddle handle design allows easy fingertip operation and features a double key set and can be padlocked
(padlock not included)

Slam-action closing mechanism utilizes a three-point stainless steel bullet latching system.

Ground wire connection deters static build-up
(wire not included)

2" high leak-proof bottom pan

Polyethylene Shelf Liners

Replaceable, leakproof 2" deep trays offer additional protection with a slightly raised curved edge to contain spills. Shelf liners are included with Acids and Corrosives, and Pesticides Cabinets. Optional with Flammable Liquids, and Paints and Inks Cabinets.
