

DESCRIPTION

Expanded Metal Locker are constructed of 13-gauge flattened expanded metal. The process of forming expanded metal reduces the material between each diamond opening providing greater visibility and ventilation, than perforated steel.

QUALITY FEATURES

Lyon Solutions to Locker Abuse

- The door frames are formed by overlapping and welding the junction between the horizontal and vertical members to form a rigid unitized structure that fully frames the door

- Standard hinges are full loop design and provide more strength than larger butt type hinges
- Full loop hinges are inserted through slots in the frame to maintain alignment and increase strength

- Door frames include integral full height 16-gauge door strikes to reinforce door edges
- Three latch points on single tier, double and triple tier doors
- Soft rubber bumpers, at door jamb locations, cushion door slams

Single Tier Lockers

with full length doors, three-point latching system, shelf and coat hooks.

Double Tier Lockers

serve twice as many people with no added floor space. Includes coat hooks.

Triple Tier Lockers

offer economical storage for shorter garments, less bulk. Includes coat hooks.

Multiple Tier Lockers

accommodate up to 9 people in minimum floor space. Padlock attachment serves as door pull.

For overall height, multiply number of openings by height listed. Add 6" to height for legs when desired.

Locker Sizes (per opening)
W" x D" x H"
12 x 12 x 60
12 x 15 x 60
12 x 18 x 60

HANDLE OPTIONS

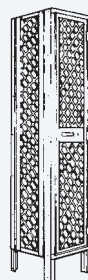

Pull Handles
with built-in padlock loop, are standard on multiple tier lockers. Optional roll point catch available.

Turn Handles
have built-in padlock attachments, and heavy-duty, 3 point locking mechanisms that fully engage the frame. Available on single, double, triple-tier lockers.

Starters / Add-Ons

Starter

Add-On

Expanded metal K.D. lockers are available as starter units, or as two wide add-on units. Add-on must be attached to a starter unit or another add-on unit.
