

Lyon Workspace Product's Lunch & Learn Program

Program name: Specifying lockers for functionality, security and safety

Program number: LYN100

Credit: 1 Learning Unit (LU)

Program goals:

- Learning the features and applications of different locker types and components.
- Selecting the right locker for the project and/or building
-
- Understanding the ergonomic, ADA and LEED benefits of the locker product line.

Participants will be able to:

- Specifying locker based on different styles, types, sizes, latches, accessories and finishes.
- Describe why lockers have specific applications and determine which style of locker is best suited for your project's requirements.
- Describe how locker finishes affect the durability and cleanliness of a locker.
