## Specifications For Steel Bench Tops

### Tops

Shall be provided in 60" and 72" widths x 28" and 34" depths. Tops shall not be less than 12 gauge steel, flanged down 1-3/4", and back approximately 2". Tops are to be punched for the attachment to steel bench legs. Tops shall have attachment angles of 14 gauge steel, one each end of the bench, thereby closing spaces at the ends, between top and bench legs.

Capacities for steel tops are based on a uniformly distributed weight across the entire surface area of the top. Capacities are as follows:

60" x 28" - 2200 #

72" x 28" - 2200 #

60" x 34" - 1700 #

72" x 34" - 1700 #
