

# LYON<sup>®</sup> MODULAR DRAWER CABINETS

Get the highest density storage solution for small to mid-sized products, while reducing your storage footprint by as much as 60%.

## Flexibility

To fit your toughest space constraints, Lyon Modular Drawer Cabinets were designed around a “Building-Block” approach. This approach equips you with unequalled storage flexibility to grow as your needs do. Cabinets are offered in a variety of sizes, from 26-7/8” to 59-1/4” high and 22-13/16” to 59-5/8” wide and 30” depth.

## Precision

Lyon drawer systems feature high-strength steel rails and precision slides with Delrin<sup>®</sup> rollers. These slides are maintenance free, self lubricating and well suited for rigorous day to day use. MDCs offer full extension, 400 pound capacity drawers.

*Delrin<sup>®</sup> rollers are much better suited for slides compared to steel ball bearings.*

## Security

Select from multiple types of locking systems – single drawer, multiple drawer, or keyed alike – to provide for a safe secure storage of high-cost products.

## Efficiency

Drawers can be subdivided into an infinite range of custom compartments to better organize your products. Lyon drawers are ergonomically designed to bring these individual compartments into full view at the best possible human reach points. This results in improved worker efficiency and increased productivity.
