

COMMITMENT TO THE ENVIRONMENT

Lyon is committed to developing products and programs that positively impact the environment. Whether the goal is creating a healthier environment, lowering operating costs, reducing emissions or maintaining an environmentally friendly product delivery system, Lyon is the clear cut leader in green initiatives within its industry.

Buying domestic steel (US steel) with recycle content and building locker, cabinet and shelving solutions in our three manufacturing plants centrally located in the USA will increase the LEED project ratings. Below is our recycled material content statement:

Lyon prides itself on being an organization that is environmentally responsible by using environmentally friendly materials in our products and having environmentally sound practices and procedures in the workplace.

Lyon's products are manufactured from steel that contains a conservatively overall estimated 53% recycled steel (36% post consumer and 17% pre consumer). Lyon purchases steel from both integrated and mini mills throughout the United States.

In addition, our packaging materials are made from either recycled or recyclable materials.

Lyon also participates in recycling programs with regard to our waste products generated during the purchase and consumption of raw materials and the manufacture of products in order to maintain our position as an environmentally friendly and responsible organization. As an organization that takes pride in being sensitive to our environment, Lyon continually works toward finding new ways to provide products to our customers that are environmentally friendly and maintaining procedures in the workplace that also do the same.

Further, Lyon has earned UL GREENGUARD Gold Certification. Recognized and referenced by more than 400 codes, rating systems, and procurement policies worldwide, the GREENGUARD Certification requires that products meet some of the world's most rigorous and comprehensive limits for low emissions of volatile organic compounds into indoor environments.

The GREENGUARD Gold standard includes health based criteria for additional chemicals and also requires lower total VOC emissions levels to ensure that products are acceptable for use in environments such as schools and healthcare facilities.

Attaining GREENGUARD Gold Certification shows Lyon is serious about making a commitment to the environment at all three of the production facilities. This certification ensures that Lyon products contribute to healthy indoor environments.

To obtain this certification, Lyon underwent extensive testing and audits conducted by UL Environment, one of the most renowned names in environmental testing and certification.
