

SMALL / MEDIUM PARTS

Stocked items are Dove Gray. Other colors available.

OPEN SHELVING

units are ideal for economical, general purpose storage. They allow light to penetrate a storage area and allow for free air flow around stored materials.

Standard side and back sway braces made from 12 gauge steel are used to stabilize open shelving units. Braces are punched to attach to upright posts with nuts and bolts.

Shelves include clips.

CLOSED SHELVING

units are used for applications where stored materials require additional protection or containment. They utilize 24 gauge back and side sheets with the basic post/shelf connection for strength and stability.

To improve the ease and speed of installation, upright assemblies can be used in place of individual posts and side sheets. End uprights are used at the beginning and end of rows. Intermediate uprights are used between units in a row. Two backs can be used when units exceed 8'1" in height; splices cover the seams on exposed two-piece backs.
