

LOCKERS WITH DIGITAL LOCKS

18 DOOR ELECTRONIC LOCKER

Lyon proudly manufactures these employee lockers with digital locks in the USA. These lockers come with a durable powder coat paint available in our standard Putty finish.

The electronic lockers includes 18-gauge, one piece doors and 24-gauge body parts. The 3-1/2-inch-wide door louvers provide ventilation for the interior of the locker. Soft rubber bumpers added at the door jamb locations provide extra cushion against door slams.

The 6-inch-high legs provide additional toe room below the locker door.

Each 3-wide locker ships assembled and ready to install! The top of each locker door is pre-punched to accept a number plate.

Digital locks features a slimline electronic lock. A user provides their own 4-digit code to secure their items. Once the code is re-entered to unlock the door, the lock re-sets for the next user. The colored indicator ring of the pop-out handle shows at a glance if the locker in use or available. Each lock uses 2 AA batteries. One master key is included per order.

RIVETED ASSEMBLED LOCKERS

Lyon's factory-assembled Riveted design may save an average of 20% due to decreased labor cost with easier assembly and convenient replacement of damaged sections. Riveted design provides a sleek aesthetic with a clean paint surface and a low-profile, drilled-in rivets in place of nuts and bolts.
