

# MODULAR DRAWER PARTITIONS

## FULL LENGTH PARTITIONS

Lyon's steel partitions fit the full depth or width of a modular drawer. These galvanized partitions fit neatly into the slots on the insides and can also be secured to the bottom of the drawer with the included hardware.

All modular drawer cabinets use the Standard\* size when partitions run from front-to-back. Choose other partitions based on the drawer width when partitions run from side-to-side.

Divide a drawer into four compartments by adding three partitions

## TOTAL DRAWER SEGMENTS

Note: All drawer sizes are designed to carry an evenly distributed load of 400 lbs. In some cases, partitions (screwed in place) are necessary to properly support the bottom of drawer. It is recommended to have one (1) partition in extra and double width drawers.

# MODULAR DRAWER DIVIDERS

## COMPARTMENT DIVIDERS

Lyon's steel dividers are used with partitions to further subdivide a drawer. The dividers have a galvanized finish and feature notched corners to easily slide between the segments in the drawer sides and partitions. This allows for the dividers to be quickly added and adjusted as needed.

Dividers larger than 14 segments also feature a base flange to secure the divider to the drawer bottom (hardware included).

Dividers slide easily in between partitions to create smaller compartments
