

MODULAR DRAWERS IN SHELVING

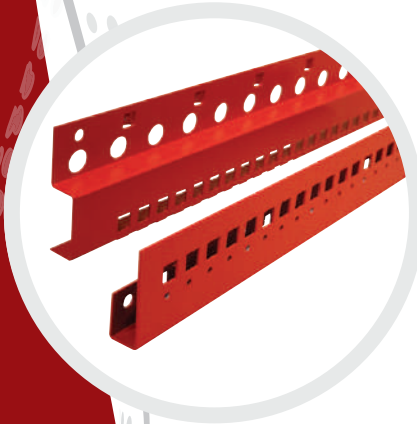

36" wide shelving with beaded posts

The combination of metal shelving with drawers offers the perfect storage solution. You can store both small parts and bulky items in one place!

Pre-engineered units are available in either 18" or 24" depths. The closed 2000 Series shelving units feature beaded posts in the front allowing clear shelf access.

Modular drawers in shelving are easy to install using only four brackets. Suspension glide rails lock into brackets, then the drawers slide into place.

Choose from starter and add-on units or build your own! View individual components in Lyon's Full Line Products Catalog or contact us for a quote.

Front and rear brackets easily attach to the shelving. Suspension glide rails then lock into the brackets.

Modular drawers fully extend for 100% visual and physical access. Easily reposition layout kit dividers as needed.
