

RIVET RACK DECKING OPTIONS

A VARIETY OF OPTIONS FOR A VARIETY OF APPLICATIONS

Lyon's rivet rack shelving is an economical solution to accommodate a variety of storage applications. With five different decking options to choose from, you'll be able to create the perfect storage unit for your needs.

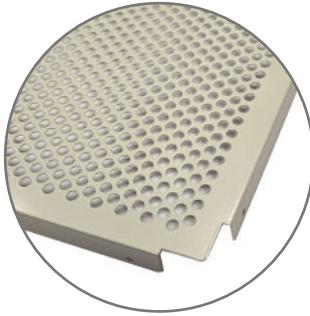

FLAT WIRE DECKING

Flat wire decking is features 5-gauge wire 2" x 4" mesh with a galvanized finish. It's the optimum decking choice to meet fire code standards.

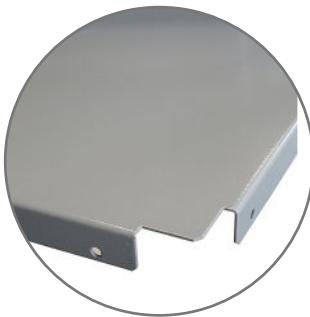

PERFORATED DECKING

20-gauge steel has notched corners to fit around rivet rack posts. Perforations allow for sprinkler access while still providing a smooth surface. Includes a powder coat finish.

SOLID STEEL DECKING

14-gauge steel has notched corners to fit around rivet rack posts. Smooth decking provides uninterrupted surface and features a powder coat finish.

DURADECK

Lightweight decking made from 100% polypropylene is remarkably light yet exceptionally rigid and impact resistant. Resists oils and grease and easily wipes clean.

PARTICLE BOARD

Particle board decking is 5/8" thick and pre-cut to size. Great for general purpose and record storage.
